

FRAGRANCE FREE POLICY

In special consideration of the health and safety of environmentally sensitive patients, we ask that you refrain from using fragrance the day you are coming to your appointment. Fragrances are most offensive to chemically injured persons because of the chemical compounds used in their manufacturing.

Some of the products that contain fragrances are, but not limited to:

- Perfume
- Essential oils
- Aftershave
- Cologne
- Hair products
- Fabric softeners
- Body and hand lotions
- Cigarette smoke in clothing or hair
- Freshly dry-cleaned clothes

We, and our environmentally sensitive patients, thank you kindly for your cooperation.
